DENTISTRY

Delivering perfect teeth aesthetics and restorations in the anterior and posterior using an innovative “non-prep” procedure

AIMS OF THE COURSE

Speaking about esthetics and restorations in dentistry, patients are frequently told to choose to either get a treatment using a direct composite method or an indirect method utilizing mostly ceramic or zirconia.

These methods are well-known by patients. Yet, they face unpleasant situations, such as discoloration, invasive tooth preparation and materials that do not provide natural comfort due to their hardness. Moreover, until now anesthesia, impressions, temporary devices, etc. are used to finalize the treatment – not to mention high costs for dentists and patients.

Dr. Stephan Lampl and his edelweiss dentistry team are very proud to announce great alternatives to the above-mentioned methods. Our technology does not depend on big equipment. Instead we are using pre-fabricated, laser-vitrified, sintered, inorganic and bio-functional units - exhibiting the characteristic of a natural tooth – that can be shaped and adjusted to your patients' individual needs.

Discover the edelweiss philosophy - get to know the POST & CORE, VENEER and OCCLUSIONVD systems where functionality is of great value followed by pure esthetics. For our young generation we developed PEDIATRIC CROWNS. Explore the completely new approach in the pediatric field of dentistry!

Let us invite you to the edelweiss dentistry headquarters in Wolfurt, Austria and be a part of the innovation in the dental world.

Dear Doctor, we welcome you to the edelweiss dentistry family!

- 13:30 PM Hands-on course VENEERS & OCCLUSIONVDs. Open discussion and FAQ
- 16:30 PM End of course - Back to hotel/airport

Course language: English

The Opportunity:

Bring your patient's plaster models and analyze the cases under professional supervision during the Hands-on course. Please take into consideration that many patient cases are suitable for starting to work successfully with edelweiss dentistry products. However, some cases may be refused due to situations, such as severe crowding for instance. Therefore: for evaluation purposes, pictures of plaster models need to be sent to your dealer prior to the course.

ALL INCLUSIVE ADVANCED WORKSHOP

Package price

€ 1.200.- per participant (incl. VAT)

Including:

- Ground transportation between airport/train station, dinner locations, office and hotel
- Accommodation for two nights
- Food and Beverages
- Get-together dinner
- Material for the workshop
- Group dinner on day one
